Why is physical distancing important?

Physical distancing ¹ is necessary because the most likely way of catching the virus is by breathing in micro-droplets from another person sneezing, coughing, or exhaling. By ensuring there is 4 square metres of space per person and maintaining a physical distance of at least 1.5 metres from others where possible, you will reduce the likelihood of exposure to micro-droplets of others.

Current health advice ² is that everyone, including people at workplaces, must implement physical distancing measures wherever possible.
