MEETING FOR GOOD

At Kimpton Fitzroy London, we're all about making travel meaningful and sustainable. That's why we're excited to support **Meeting for Good**, helping event planners create experiences that not only leave a lasting impact but also do good for the planet.

100% GREEN ENERGY

We use LED lighting across the hotel and motion sensors in back of house, as well as a reduced heating and air conditioning policy to ensure a low carbon-footprint.

RESPONSIBLE ROUTINES

We reduce waste with digital signage and sales agreements, while our **Linen & Towel Reuse Program** conserves water and energy.

PARTNERED WITH LOCAL CAUSES

We partner with **Coram**, the UK's oldest children's charity, to support children in care. The hotel aims to raise awareness and funds for Coram's essential services, which provide education, advocacy and protection for children who have been placed in the care system.

SUSTAINABLE SIPS

We use refillable glass water bottles in our meeting and events spaces, ensuring there is no plastic waste.

NO MORE LANDFILL

We recycle our waste from meetings and events. Instead of sending it to landfill, it is being incinerated and transformed into fuel.

REDUCING FOOD WASTE

As well as providing reusable serviceware for banqueting, we ensure there is minimal food waste across our meetings and events.

LOCALLY SOURCED INGREDIENTS

We partner with nearby farms and local suppliers to cut carbon emissions from long-haul transport. Our menus feature locally sourced ingredients and plant-based options, too.
