#### **HEALTHY EATING**

Your body relies on a constant supply of energy to function well and after sleeping for 6 to 10 hours, breaking the fast provides a boost of energy in the form of food. Breakfast is essential in providing your body with vital nourishment for the day ahead and kick start the body's metabolism, digestion and the brain into action.

Eating breakfast has been proven to improve concentration, mental performance, memory and mood, as well as in maintaining long term weight loss and reducing the risk of obesity and insulin resistance.

A good breakfast includes complex carbohydrates, which are slow to release energy and provide vitamins, minerals and fibre.
