## SPECIALTY COFFEE

<b>BATCH BREW</b> Batch brew is pour over coffee created using machine assistance to do the pouring over of water onto coffee.	20
<b>COLD BREW</b> Cold brewing is a method of brewing that combines ground coffee & cool water and uses time instead of heat to extract the flavor.	22
<b>COLD DRIP</b> Cold drip coffee separates the cold water from the coffee grounds completely. The technique requires a cold drip apparatus or drip tower. Produces a low-acid that find pleasingly delicate.	19
<b>FRENCH PRESS</b> French press uses a plunger to press against the mixture of coffee & hot water to extract the coffee oils and flavor. This gadget gives you full bodied coffee as coffee grinds must be coarser and long brewing time.	21
<b>V60 POUR OVER</b> This method is a favorite among many baristas. There is less sediments in the drink compared to French Press because of the use of paper filters.	24
<b>CHEMEX</b> The Chemex is a type of manual coffee maker. It uses an elegant hourglass shaped flask and proprietary filters that are thicker than normal drip coffee filters. Naturally sweeter and mild.	24
<b>AEROPRESS</b> A unique device that combines simple and long lasting brew methods. This simply means that the coffee sits in water and is then filtered finely with a paper filter.	24
<b>SYPHON</b> A vacuum coffee maker brews coffee using two chambers where vapor pressure and gravity produce coffee. This type of coffee maker is also known as vac pot.	26
