

Meeting for Good with IHG® Hotels & Resorts

When hosting a Meeting for Good at voco® Dubai, planners can expect efforts in place to support a more sustainable meeting experience.

Hotel Practices

- The hotel uses **digital collateral and electronic sales agreements** to significantly reduce its reliance on paper. This approach not only minimizes waste sent to landfills but also conserves natural resources, streamlines operations, and demonstrates the hotel's ongoing commitment to environmentally responsible practices.
- A **linen & towel reuse program** is in place, helping to minimize water and energy consumption associated with frequent laundry cycles.

Meeting Space

- The hotel has implemented a **plastic-free hydration program**, replacing disposable plastic bottles with refillable dispensers, pitchers, and glassware across all meeting areas.
- **HVAC systems and lighting** are automatically reduced when rooms are unoccupied, lowering energy consumption during non-occupancy periods.
- Our **digital signage** provides real-time information throughout the property, reducing the need for printed materials.
- Our meeting spaces are set up with **single-use free items** such as notepads, pens, coasters, or flipcharts. These items can be provided upon request, helping to minimize waste.

Food & Beverage

- voco® Dubai implements a comprehensive **food waste reduction strategy**, with targeted initiatives designed to minimize waste generated during banquets.
- We offer alternative menu selections featuring **locally sourced ingredients**, helping to reduce the carbon footprint associated with sourcing and preparation.
- Menus and labelling systems are **reusable or digital**, significantly reducing paper waste from single-use materials.
- Disposable items are replaced with **reusable tableware** as part of our commitment to sustainable banquet practices.
