

Reducing plastic waste

VOCO®

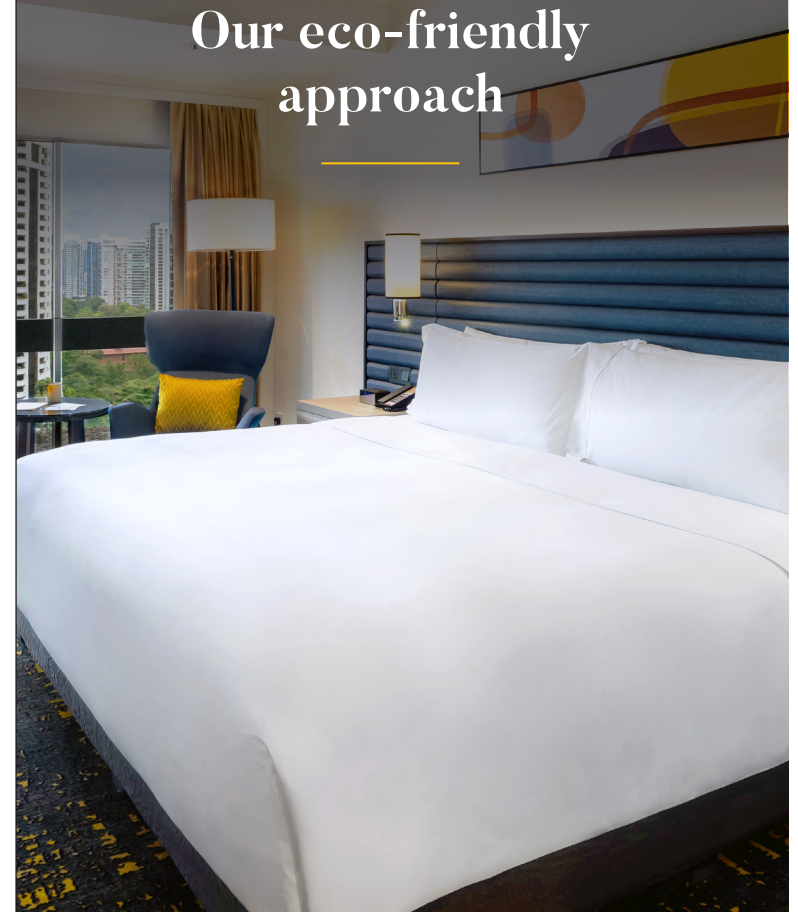

AN IHG HOTEL

Orchard Singapore

A more sustainable future

“Step by step” is our mantra for sustainability. It’s characterised by two pillars: a commitment to innovation and sustainability; and a belief that small steps collectively make a big difference.

Our eco-friendly approach

Adopting large-format bathroom amenities reduces plastic waste.

In-room bottled water is replaced with filtered water on tap to reduce plastic waste.

Using compostable take-away coffee cups reduces our impact on the environment when they are correctly composted.

Any used plastic bottles can be dropped into the reverse vending machine located at the hotel lobby. Your recycled plastic bottles will be transformed into sustainable uniforms and other useful things.

IHG
Green Engage™

IHG Green Engage™ provides our hotels with more than 200 Green Solutions, helping them manage and report their use of energy, carbon, water and waste, and minimise their environmental impact.

The filling of our indulgent bedding is made from 100% recycled materials.

Aerated shower heads can help reduce water consumption compared to a standard shower head.

Our bathroom amenities use plant-based ingredients whose sourcing does not negatively impact their ecosystem.

In-room dining is ordered through a digital system which makes the food ordering process more efficient and reduces the amount of collateral printed.

We are the first hotel in Asia to achieve the Marine Stewardship Council (MSC) and Aquaculture Stewardship Council (ASC) Chain of Custody certifications in 2015.

Visit our vertical garden where vegetables and herbs are grown and incorporated into the hotel's menus.
