

BOSHA Meetings & Events Gallery Example

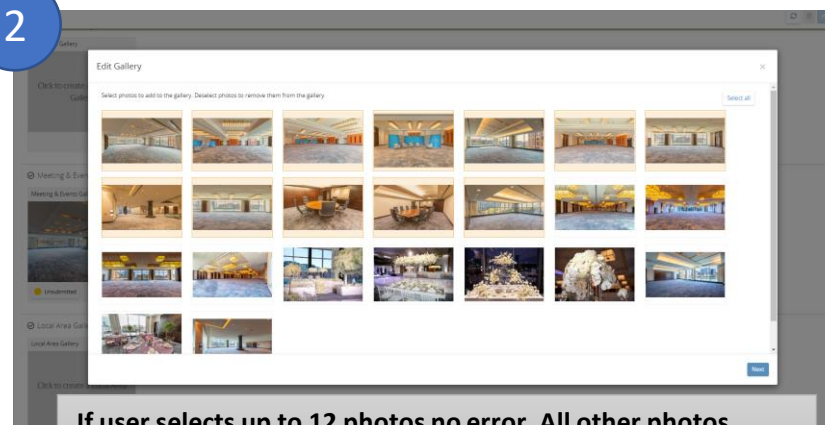

- Hotel has 23 photos that are categorized meetings & events, so all appear in the gallery.
- Currently 20 are active in the gallery. They are active because they are highlighted orange-ish.
- We would like to change this behavior so **the user can only select 12**. If they select 13 or more, they will get an error message. The rest of the photos remain in the gallery. This way, they can always switch out the photos they wish.

1

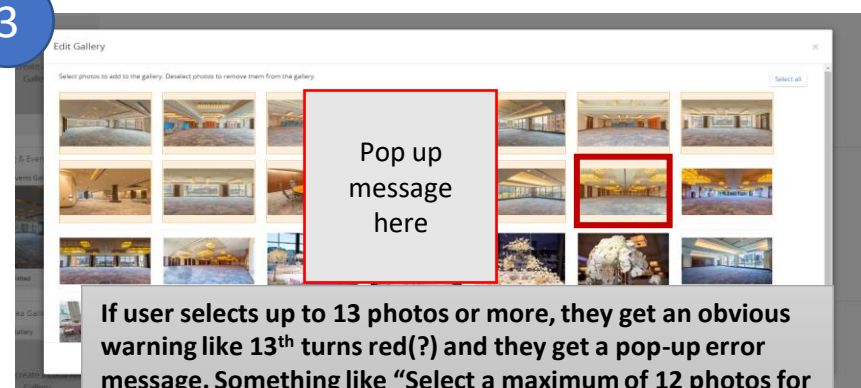

Note: Update text at top of page to read "Select up to 12 photos to add to the gallery"

2

If user selects up to 12 photos no error. All other photos remain in gallery.

3

Pop up
message
here

If user selects up to 13 photos or more, they get an obvious warning like 13th turns red(?) and they get a pop-up error message. Something like "Select a maximum of 12 photos for your gallery."

Edit Gallery

Select photos to add to the gallery. Deselect photos to remove them from the gallery.

Update text at top of page to read "Select up to 12 photos to add to the gallery"
